To whom it may concern,

I am the President and Certified Operator of a State of Florida, Licensed Pest Control Company and have been in the business for over 20 years. I saw the need for an "All Natural" product to use for the many Bedbug problems we are having in Florida. There has been a lot of negative publicity about the use of pesticides, especially on and around beds and bedding areas. I began testing the Cedar Oil Industry products about 6 months ago, mainly for Bedbug infestations. I simply followed the directions: 1) spray the Cedar Oil product on all main Bedbug harborage areas and 2) fog the room thoroughly with the Cedar Oil product, using the Thermal Fogging machine and close the room for 6 hours. I then perform the same treatment as a follow-up treatment in 10-14 days. I give a 60 day guarantee, with unlimited re-treatments if needed. Fortunately, I have never had to perform a 3rd treatment. This program has worked every time.

I have had such tremendous success with this program that I now offer this program "exclusively" for all our Bedbug infestations. Since Bedbugs are probably the toughest "Biting Insect" to eliminate, and due to our success using the Cedar Oil products, I am also using the same basic program for all "Biting Insects" such as Fleas, Ticks and Mites. I am now using the Cedar Oil products for exterior Perimeter Pest Control treatments and testing it on Lawns and Landscape plants.

I am thrilled with the success we are having and I am working on a complete inside and outside "All Natural Cedar Oil Program" to offer my Customers.

Please let me know if there are any other questions.

Thank you,

Jim Maler

President
