To whom it may concern:

I am the structural repair and maintenance supervisor at Fort Lewis Military Installation in Washington State.

I have contracted Virgil Pelton to seal with Petri -Wood at least 3 buildings that have had major water issues, Example: when it rained the water would literally run down the inside wall of our buildings. This has been an ongoing problem for many years some of them 10 to 15 yrs. The Petri-wood product has sealed up all of the areas it has been applied to and we are no longer having water issues. I am currently having Virgil seal as many buildings as I can under my authority this product works on CMU block, Brick, Wood as well as EFIS or Stucco coverings.
