

BEST NATURAL BUG REPELLANT EVER!

June 30, 2016

Reviewer: Penny from NY United States

I tried all other chemical bug repellants and even the Deet Free ones, but by far this one is the best with absolutely no dangerous side effects for humans, young and old, and pets, small and large. It even will kill mites of all kinds. I highly recommend this product!

TESTIMONIAL:

At www.RoyalStandardPoodles.com we have worked with cedar oil products for over 8 yrs now, 2015. The past 5+ years have been with Dr. Ben's that I could provide and sell directly to my standard poodle customers and the public.

Cedar oil products have done what I need in protecting myself and my poodles from spiders, fleas, ticks and mosquitoes here in central MN. With cedar oil products and fogger I have been able to have a flea free home for all of these years. Ticks are cut to only a half dozen found on ALL my poodles all the spring, summer and fall months of their seasonal life. MN is known for being among the worst states for the tick born diseases known as Lyme's and ehrlichia so this is major to protect my poodles with Dr. Ben's. We spray the poodles twice a week during these months as well as always washing them with Dr. Ben's cedar oil shampoo. Before I started using Dr. Ben's, customers were calling me with their pets coming down with seizures, which I test all my adults and are clear of any hereditary known problems. I would recommend cedar oil instead of the vet recommended flea and tick spot on's and the seizures ALL stopped! I also recommend the Nuvet vitamin supplement, code #89093, to help them while they got healthy again.

We spray 8 acres of parks with Dr. Ben's during the needed months to cause the critters exodus or demise to help protect everyone. My staff members are required to spray themselves before going out into the parks for their protection. I have found these to be the healthiest organic products on the market for our health and protection. Dr. Ben's owners always find time to answer my questions, drop ship products to my customers in the most timely manner, and care for their questions and considerations. So very appreciated when I don't have the answers and the experts can help them directly with their needs.

I have not seen a tick or flea in over a month!

January 16, 2013

Reviewer: Jennifer McRae from Weeki Wachee, FL United States

I ordered the concentrate to treat my yard and 4 dogs. I haven't seen any ticks or fleas in over a month. It is so easy to spray my yard and my dogs! I will use this product forever! Thank You, Thank You, Thank You!

Amazing Product!

I'm so thankful for a natural product that is so effective! Before using this product, flies were a huge nuisance for our dairy cow and we had to put box fans blowing into the stanchion to try to

keep bugs away during milking. Now, all we do is spray the cow and the flies are gone!! Our cow is content and so are we :)

We are looking forward to using this product on our dairy sheep during milking season. Thank you so much!

Fleas no more.

I have been battling what seemed to be a never-ending war with fleas that my dogs somehow contracted. I have lived in deserts my entire life and have never experienced any pest problems until now. I tried several bug sprays various home remedies and countless vet visits all of which only lessened the burden temporarily. I remember being given a spray made by this company when I was in the Marine Corps. I looked it up online which lead me here. So, I decided to buy the indoor eradication kit. This stuff went all genocidal on the flea invasion. My pets are fine with it and the best part is there is not a single flea left. Having hardwood floors made the application an easy task. I am ready just in case any eggs get to survive this round.

This worked so well that I am ignoring the fact I slipped and fell due to the oily residue it left at first. I wish I had ordered this in the first place as it would have saved me a few hundred dollars on pesticides and vet visits.

I cannot give this product enough praise! Simply put: it works, it works, it works AND no harmful pesticides on my dogs, in my yard in the air I breath. By the way: my roses love it, too. They have never looked more beautiful!

Cedar oil for Japanese beetles

May 28, 2017

Reviewer: Rose Gebo from Eden Prairie, MN United States

I purchased the product and sprayed it according to instructions around the base of the tree where beetles were a few weeks away from the emerging. I water the product into the soil and went back two days later to check the progress. I found 5 beetles and each one was dead. The product is amazing! And the best part is that it is non-toxic.
